

Natural Cork is comprised of premium quality, pure grain, natural cork. It is a cost efficient, self healing tackboard material that will remain pliable indefinitely. Its smooth, resilient surface allows push-pins, tacks, or staples to be easily inserted, yet still hold firmly. Natural Cork is available in 1/8" or 1/4" thickness.

Is Your Specification Correct? Understanding the Tackable Surface... The natural cork tackable surface has two available options (see right): 1/4" cork on a 1/4" fiberboard or 1/8" cork available on 3/8" fiberboard.

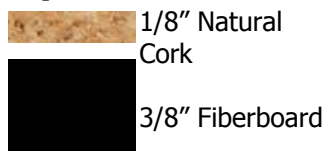

The typical push pin stab is 3/8" long. For best results, we recommend 1/8" cork on 3/8" fiberboard backing.

Available in 4', 6', 8', 9', 10', and 12' x 48" stock sheets.
